From present indications potatoes may soon be one of the luxuries of the local market. They have advanced more than a dollar a barrel lately and are now bringing the highest market price obtained in years. It is possible that the price of \$4.50 to \$5 a barrel will even increase. Dealers say that no good potatoes can be gotten for the local market because all on sale are being shipped to New York, where potatoes are even scarcer than here.

Few roads, if any, in this section have done the extensive advertising that has been done by the "Henderson Route," and from all reports, they are reaping the benefit that is sure to follow judicious advertising. Mr. L. J. Irwin, the general passenger agent, has done a great deal to make his road popular, and the enforced additional equipment and new heavy rail attest the success with which he is meeting.

Albert and Charley Morris were shot dead in a fight at Crockett'sville, Breathitt county, by Tom White.

Over seven thousand pensions have already been granted for disabilities incurred in the Spanish War, nearly all of them in the West Indies. As the entire army force there was less than 20,000 men, it is evident that if the Spanish had kept on fighting a little longer or army would have been exterminated.

Few Rural Mail Routes in Kentucky.

In the matter of establishing rural free mail delivery routes, Kentucky shows marvelous lack of enterprise. While the system is progressing rapidly in the Northern states, and is proving most satisfactory wherever introduced, the figures show that Kentucky is making little effort to make use of a valuable privilege. For instance, Ohio has 500 routes and 834 applications pending; Indiana has 358 routes and twice as many pending. Kentucky has only thirteen routes and only thirty-nine applications pending. While this state of affairs shows a grievous lack of public spirit, it may be attributed to some extent to the lack of information regarding the system, and the manner in which rural delivery is secured. A petition descriptive of the proposed route is forwarded to the Congressman of the district, and after endorsement by him, is sent to the postoffice department. It is then referred to a subordinate agent for investigation and report. In event of a favorable recommendation from him, the petition is signed by the proper officials, and the route is put into operation. The question of rural delivery is closely connected with the good roads agitation which is attracting so much attention just now. Good roads are a necessary adjunct to the permanence of the system, as the department insists that all highways over which carriers pass be kept in perfect condition.—Kentucky Advocate.

It Brought a Gally Washer.

One of the most practical farmers in this county says that any drought can be broken if people could only be made to think so and fire off dynamite on their farms. A few years ago, he said, he lived on one of the best and largest farms in Mercer and a drought came. The earth was blistered and it looked as if he wouldn't make half enough to pay his big rent. One of the stipulations of his contract was that he should blow up five or six hundred stumps on the place, and one day, feeling blue over his poor prospects, he went out and spent the morning dynamiting some of the stumps. Before night dark, rolling clouds appeared, and he and his immediate neighbors enjoyed a copious ground washer, while the drought continued in other portions of the county. It is a well established fact that heavy rains always followed a battle during the civil war, and in many instances the rain came while the conflict raged. Both snow and rain followed the cannonading at Perryville. Last Saturday just after the slaughter of the twenty-eight dogs in the suburbs a few drops of blessed water came down. Whether the firing of the pistols had anything to do with it or not we leave to a more scientific mind to determine, but if we had a corn field we believe we would fire off a bomb or two thereabouts to test the theory, for it could do no harm—if the fuse was long enough. A good way to test it would be to send the explosive up in small balloons and let the discharges take place in the clouds.—Harrodsburg Democrat.

The most successful man is not the one who makes the most money, but the man who gets the most enjoyment out of what he does he does make.

STOPS PAIN

Athens, Tenn., Jan. 27, 1901.
Ever since the first appearance of my menses they were very irregular and I suffered with great pain in my hips, back, stomach and legs, with terrible bearing down pains in the abdomen. During the past month I have been taking Wine of Cardui and Theodor's Black-Draught, and I passed the monthly period without pain for the first time in years.
NANNIE DAVIS.

What is life worth to a woman suffering like Nannie Davis suffered? Yet there are women in thousands of homes to-day who are bearing those terrible menstrual pains in silence. If you are one of these we want to say that this same

WINE OF CARDUI

will bring you permanent relief. Console yourself with the knowledge that 1,000,000 women have been completely cured by Wine of Cardui. These women suffered from leucorrhoea, irregular menses, headache, backache, and bearing down pains. Wine of Cardui will stop all these aches and pains for you. Purchase a \$1.00 bottle of Wine of Cardui to-day and take it in the privacy of your home.

Before patronizing a peddler or fakir ask yourself the following questions: Did the peddler give anything to the school debt? Did he sit up with you when you were sick? When your house burned was his name on the list of those who helped you in your misfortune? Was he one of your sympathizers when death came to your door? Did he carry you on his back when you were out of work long five years ago? Do you see his ad every week in your home paper? If he won't respond to all of these requirements he certainly is not entitled to as much consideration as your local business men, for they help you in these particulars and many more.

The report of the Bureau of Agriculture on the conditions of the crops in Kentucky up to August has been issued. It shows the great damage done by the recent drouth. Only fifty-five per cent. of the corn crop will be made. The small grain was not injured as it was in the sheaf. Out of a ninety-nine per cent hemp crop expected, only seventy-one per cent will be realized, and the tobacco crop has fallen from an eighty-one per cent expectation to fifty-five per cent. The fruit crop has also been hurt considerably.

At Panama, Columbia, by Chamberlain's Colic Cholera and Diarrhoea Remedy. Dr. Chas. H. Utter, a prominent physician, of Panama, Columbia, in a recent letter states: "Last March I had as a patient a young lady sixteen years of age, who had a very bad attack of dysintery. Everything I prescribed for her proved ineffectual and she was growing worse every hour. Her parents were sure she would die. She had become so weak that she could not turn over in bed. What to do at this critical moment was a study for me, but I thought of Chamberlain's Colic Cholera and Diarrhoea Remedy and as a last resort prescribed it. The most wonderful was effected. Within eight hours she was feeling much better; inside of three days she was upon her feet and at the end of one week was entirely well." For sale by J. W. Dawson & Bro. and Morgan McKinney.

Perfection is a word that cannot be applied to many products, but when it is used to identify Kerr's best flour. It expresses a truth.

The Dry Year of '54.

In 1854, before most of the people who are sweltering today were born, there was a hot spell, like that from which we are suffering now, and which had the peculiarity that it began on June 22, the same day that our present hot spell began. From that date to September 17 the thermometer never registered less than 90 degrees. During that period of 71 days it never went as high as 107.2, as our record figures in the present torridity, but the mean record for the 71 days of that hot spell was 94.43; for 28 days of that time the mean was 101.53, the maximum was 104 degrees and the minimum was 90 degrees. For 28 consecutive days the thermometer did not fall below 100 degrees. Dr. J. A. Phelps, who remembers this spell told of in the Louisville Commercial, tells us that the whole country was parched and the best corn raised hardly averaged half a barrel to the acre. —Harrodsburg Democrat.
